## CAPABILITY STATEMENT

Rusty's Solar Coating is breaking into the solar utility industry with cutting-edge scientific innovations

proven to: Increase Photovoltaic System Efficiency  
Decrease Maintenance Spend  
Conserve Water

## CAPABILITIES

Rusty's Solar Coating offers numerous self-cleaning benefits that enhance both the efficiency and longevity of your solar panel farm.

- Advanced Coating Repels Dirt, Dust, Excrement & Soiling
- Increased Solar Panel Productivity by 9% or More
- Increase Solar Panel Efficiency
- Reduce Glare Which Increases Efficiency & Productivity
- Passive, Self-Cleaning Effect Using the Sun, Rain, Dew & Wind
- Reduce Water Use & Waste
- Reduce Labor Cost
- No More "Deep Cleaning" Panels
- Reduce Downtime
- Solar Panels Remain Clean for Years

## DIFFERENTIATORS

Rusty's Solar Coating PROTECTS your solar investment. Our coating is a New Technology specifically formulated for solar panels. In development since 2018 and completing one year live solar farm testing, our coating is ready for application at full scale. There is nothing like it in the market.

We provide the EXTRA!

- Extra Power – your investment captures more energy
- Extra Efficiency – panels perform closer to their full potential
- Extra Productivity – more photons absorbed for conversion
- Extra Water Savings – reduce water use
- Extra Labor Savings – reduce cleaning to once a year or two
- Extra Effective – nanometer thin coating layer
- Extra Cool – reduce panel temperature
- Extra Clean – soiling doesn't build up anymore

## PERFORMANCE

Rusty & Laila Jacobs of Rusty's Solar Cleaning & Protecting are Arizona natives kicking off right here at home. After serving all of Arizona's solar farms, we will spread nationwide!
